HEALTH AND SAFETY - ACCIDENTS AND NEAR MISSES

All accidents/incidents must be reported to the Owner/Manager, investigated and an accident report filed. Report the location, description of the incident, number of injured people, type of injuries.

Ensure all persons on site are accounted for and out of harm's way (Note: where there is a risk of endangering others e.g. electrocution do not put yourself or others at risk.)

All near misses (i.e. unintentional incident that could have caused damage, injury or death but was narrowly avoided) must also be reported to management as these help us identify any potential hazards that could harm others.

In the event of a serious harm accident the area must be cordoned off and left as is for investigators.

The location of the accident register is:
